SUMMARY

Computer Science graduate (Summa Cum Laude, 3.9 GPA) who designs interfaces and then builds them. Ships responsive, accessible web apps in JavaScript, HTML and CSS, with backend experience in Python, Django and SQL. Brings experience validating system data, training teams on new systems, and working with technical and non-technical stakeholders.

PROJECTS

Weekflow | *Weekly planner web app, shipped and in daily use* JavaScript, HTML, CSS

- Designed and built a single-page planner in vanilla JavaScript, separating task state, UI rendering and event handling.
- Added drag-and-drop scheduling, resilient local storage, a Pomodoro timer, dark mode and JSON/CSV export.
- Used daily by coworkers to run day-to-day operations; their feedback drives each new feature and fix.

Helix & Hue Studio | *UX case study and responsive salon website (concept)* JavaScript, HTML, CSS

- Audited three competitor sites, built proto-personas, a journey map and user flow, and wireframed phone-first.
- Built an accessible curl-type gallery filter, met WCAG AA contrast and 44px touch targets, and wrote a usability test plan.

Charlotte Ironclad FC | *Sports marketing website (concept)* Sass, Bootstrap 5

- Designed and built a multi-section marketing site on a Sass design system, with a motion-safe animated ticker.

Palette | *Mobile app design (concept)* Figma

- Designed a four-screen discovery app flow (onboarding, feed, item detail, boards) as one consistent system.

Inventory API and Vehicle Management System Python

- Developed a backend API for tracking inventory and shipments, drawing on real-world logistics workflow knowledge.
- Built an object-oriented inventory system using inheritance, encapsulation and polymorphism, with test cases.

EDUCATION

Bachelor of Science in Computer Science | *University of the People* August 2026

GPA 3.9 | Summa Cum Laude | President's List

Coursework: Web Programming 1 and 2, Software Engineering 1 and 2, Data Structures, Databases 1 and 2, Operating Systems 1 and 2, Data Mining and Machine Learning, Systems and Application Security, Advanced Networking and Data Security

In Progress: CompTIA Security+ (studying), CodePath CYB102 Intermediate Cybersecurity (Fall 2026)

EXPERIENCE

Operations Lead | *RXO* June 2026 to Present | Charlotte, NC

- Validate data across TMS platforms, flag discrepancies, and document outcomes for reporting and process improvement.
- Train teams at other RXO locations, in person and remotely, on systems and processes ahead of new launches.
- Act as point of contact between client (Lowe's) and carrier leadership, resolving delivery issues in real time.

Logistics Specialist | *RXO* Sept 2025 to June 2026 | Charlotte, NC

- Managed routing, scheduling and real-time delivery tracking; produced KPI reports and resolved system data issues.

Business Retention Representative | *Spectrum* May 2025 to Aug 2025 | Charlotte, NC

- Troubleshoot internet and phone issues for business customers; escalated complex cases with clear technical notes.

Member Service Representative | *Professional Assist Corp* Nov 2021 to June 2023 | Golden, CO

- Resolved website and account access issues, achieving 95% first-contact resolution through structured issue tracking.

SKILLS
